

Small Vinyl Decal Application Instructions

Step 1

Rub the decal to be sure the transfer tape is properly adhered to the decal.

Step 2

Clean and dry the desired area. Decals will stick best to clean smooth surfaces.

Step 3

Remove transfer tape and graphic from backing paper making sure graphic stays adhered to transfer tape.

Step 4

Carefully position the decal to the desired area. Once decal sticks it will be nearly impossible to reposition without destroying the decal. Rub the decal from one side to the other, to eliminate any air bubbles.

Step 5

Use a squeegee or hard edged object like a credit card to make sure the entire decal is fully adhered to the surface.

Step 6

Slowly remove the transfer tape. Making sure no part of the decal remains on the transfer tape.

Step 7

Check for air bubbles. In most cases air bubbles can be worked to the edge of the decal, but if not, a pin hole will allow the air out and become virtually invisible, once the bubble is gone.
